Professional Summary

Enthusiastic Software Engineering with a strong foundation in front-end programming and a passion for exploration and learning. Proven ability to adapt quickly and collaborate effectively in team environments. Experienced in using AI tools and familiar with multiple programming languages.

Education

Bachelor of Science in Software Engineering | Homs University **Sep 2020 - Oct 2025**
Cumulative GPA : 76,98% | Top 10%

High School Diploma | Muhsen Abbas Secondary School **Sep 2019 - Aug 2020**
Grade: 93,17% | 2702/2900

Work Experience

Apex Solutions **Oct 2025 – Present**

Co-Founder & Frontend Lead

- Co-founded a digital solutions team, establishing the technical foundation and project workflows for freelance web development.
- Leading frontend development with a focus on scalable architectures and continuous performance optimization.
- Directing technical workflows under Agile methodologies (Scrum) to ensure efficient team collaboration and high-quality delivery.
- Overseeing seamless API integration and the entire deployment process, ensuring secure and reliable application launches.

Darrebni Company | Homs, Syria **Apr 2024 – Oct 2024**

Top-Performing Front-End Trainee

- Completed 250 hours of training in front-end development, specializing in JavaScript (ES6+), CSS, Bootstrap, TypeScript, GitHub and React.
- Developed "Bug Bounty Syria" as a final graduation project: A dual-sided platform connecting security researchers with companies to identify and fix software vulnerabilities.
- Received a recommendation letter for outstanding performance and distinction in the training program.

Skills

Programming Languages: C++, Java, C#, MATLAB, Python.

Web / Frontend & Backend: React.js, Next.js, Node.js, PWA, JavaScript, TypeScript, Bootstrap, CSS.

Tools & Technologies: Git / GitHub (CI/CD), MySql, MongoDB, Figma, AI Tools, Microsoft Office, Odoo.

Soft Skills: Quick Learner, Adaptability, Team Collaboration ,Problem solving.

Languages: **Arabic** (Native) **| Deutsch** (Intermediate, B1 ÖSD) **| English** (Upper-Intermediate, B2 Level).

Projects

National Diabetes Program | [React.js, Mantine UI , Go, AI] Feb 2025 - Oct 2025

- Developed a nationwide healthcare platform to centralize patient data and medication records across multiple medical centers.
- Built dynamic dashboards using React.js to visualize complex medical data, charts, and AI-driven health forecasts.
- Implemented features for patient self-monitoring, including medical consultation modules and automated appointment scheduling.
- Collaborated on integrating the frontend with a high-performance Go-lang backend to handle extensive database processing.

Bug Bounty Syria | [React.js, Mantine UI] Jul 2024 - Oct 2024

- Engineered an integrated platform connecting security researchers with companies to identify and patch system vulnerabilities.
- Designed and developed highly intuitive interfaces using Mantine UI, ensuring a seamless user experience (UX) for technical users.
- Ensured full responsiveness across all devices, focusing on accessibility and clean component architecture.
- Streamlined the reward and evaluation workflow through a secure and simplified frontend interface.

Additional Information

- Hands-on experience in computer hardware and software repair acquired over several years.
- Passionate about programming and continuous learning.
- Actively developing skills in front-end technologies and exploring new tools.
- My interests include chess, football, and tennis. I am also passionate about research, content creation, fast typing, and networking.
